HW46 - Plan for Wrapper of Super Array

2021-12-09

Time spent: 30 min

Revisions

- We're thinking about using `get()` to access the elements in the Super Array object that is provided as an argument and adding these elements based on how large they are. `add` arguments already is array?

if statements

Failures considered:

- For loop not stopping since the element has a value greater than all the elements on the list
